Job Description

The Research Data Management (RDM) Librarian will develop and deliver RDM services to faculty and graduate student researchers, be responsible for communicating developments in research data management (RDM) requirements of federal agencies and publishers, provide training and consultations with faculty and students on finding, evaluating, and sharing datasets using data analytics tools and systems, build internal and external partnerships, and participate in other scholarly communication projects as needed. The RDM Librarian will have liaison librarian responsibilities (research consultations, collection development, instruction) for one or more departments, to be assigned based on Libraries needs and the skills and interests of the incumbent.

Research Data Management Librarian
Old Dominion University

Minimum Qualifications - knowledge, skills, and abilities

- Basic familiarity with emerging trends in research data management
- Basic knowledge of data collection, analysis, organization, and management.
- Basic familiarity with scholarly communication issues (including open access, copyright, author rights).
