longitudinal symptom networks to assess interactions between mood, stress, substance use and sexual function among heterosexual and bisexual women. This fellowship is designed as a two-year experience that includes in-depth training in sexuality science, quantitative and qualitative methods, and interdisciplinary collaboration. **In-person residency in the lab is preferred but hybrid/off-site work is negotiable.**

Salary and benefits are commensurate with NIH guidelines. Start date is flexible, with a target start date between March and Sept 2025.

For more information, please visit <https://employment.unl.edu/postings/93548>

We will begin reviewing applications October 18, 2024 and continue to review until the position is filled.

### **EEO/AA Policy**

As an EO/AA employer, the University of Nebraska considers qualified applicants for employment without regard to race, color, ethnicity, national origin, sex, pregnancy, sexual orientation, gender identity, religion, disability, age, genetic information, veteran status, marital status, and/or political affiliation. See <https://www.unl.edu/equity/notice-nondiscrimination>.
