position to support a randomized experiment on social mobility expectations. The role involves assisting with survey design, managing experimental implementation, analyzing data using statistical software (e.g., Stata or Python), and contributing to literature reviews and academic writing. This position offers hands-on research experience at the intersection of behavioral economics and household finance.

**Key Responsibilities:**

- Assist in the design and implementation of a randomized controlled trial (RCT)
- Develop, test, and deploy survey instruments and treatment materials (e.g., visuals, text framing)
- Manage participant recruitment, randomization protocols, and data collection logistics
- Clean and analyze survey data using Stata, R, or Python
- Conduct literature reviews on housing affordability, expectation formation, and behavioral responses to policy

**Job Requirements:**

- Bachelor's degree in Economics, Public Policy, or a related field
- Familiarity with RCTs or behavioral experiments
- Proficiency in Stata, R, or Python
-
