international profile as a centre of excellence for health behavioural sciences.

We are looking for a Data Scientist to work closely with the centre's Directors to manage research analyses and to secure research grants. The role will focus on research design and development, project management, and day-to-day research operations, such as data storage, budgets, expenses, assets, and ethics approvals.

Key Responsibilities:

- Design and implement research, including statistical models and algorithms to extract insights from data
- Develop data visualisations to communicate research findings
- Support and co-lead research projects, including, securing ethics approval, contributing to academic publications and reports, managing operations, etc.
- Identify and secure funding opportunities from grants, partnerships and commercialisation
- Lead research projects, including ethics approvals, data collection, analyses and dissemination
- Represent HABITS at conferences, meetings, and other events
- Collaborate with institutions and stakeholders to advance the centre's mission and reputation
- Promote and communicate HABITS achievements and research impact through publications, presentations and media engagement.
-
