Healthcare Group (NHG), the Asian Centre for Health Behavioural Insights & Interventions (HABITS) aims to improve population health through multidisciplinary and translational research to support interventions, policy and programmes; strengthen national capabilities through the integration of translational research into health intervention processes; and increase Singapore's regional and international profile as a centre of excellence for health behavioural sciences.

We are looking for a Research Associate / Research Assistant to work closely with the centre's Directors to manage research analyses and to secure research grants. The role will focus on research design and development, project management, and day-to-day research operations, such as data storage, budgets, expenses, assets, and ethics approvals.

Key Responsibilities:

- Design and implement research, including literature review, data collection, and data analyses.
- Conduct and interpret qualitative and quantitative research
- Support research projects, including, securing ethics approval, contributing to academic publications and reports, managing operations, etc.
- Work closely with collaborators and third-party service providers in conducting the projects
- Daily operational, administrative, and logistics duties related to the research projects
- Conduct and organise project meetings
- Support the development of grant proposals
-
