Posting Detail Information

Position Summary

The **Senior Research Support Specialist (SRSS)** within the [Department of Psychology](#) will join a multidisciplinary team that currently has three ongoing [federally funded studies](#). One is a clinical trial, the goal of which is to conduct an innovative, rigorous experimental evaluation of remote vs. in-person methods on trial efficiency (accrual) and quality (retention, treatment adherence, bio-specimen completion rates). The second project is a laboratory study that aims to learn more about abstinence-induced withdrawal among daily vapers and how that compares to daily smokers. The third project is a laboratory study that uses technology we've developed to passively assess how much people vape and their vaping patterns.

The SRSS will operate and make decisions within defined protocols, relying on the experience and direction of research scientists and senior staff for carrying out more complex analytical tasks. Some initiative is required in recognizing situations where standard operating procedures and methods may not be appropriate and then bringing these situations to the attention of the research scientists and senior staff for further decision-making.

Learn more:

- Our [benefits](#), where we prioritize your well-being and success to enhance every aspect of your life.
- Being a part of the [University at Buffalo community](#).

As an Equal Opportunity / Affirmative Action employer, the Research Foundation will not discriminate in its employment practices due to an applicant's race, color, religion, sex, sexual orientation, gender identity, national origin and veteran or disability status.

Minimum Qualifications

- Bachelors degree in psychology or another health-related profession
- Combination of conscientious adherence to study protocols and excellent interpersonal skills
- Basic proficiency with keyboarding, Microsoft Word, Excel, and Zoom
